FINISH *Matte Black*

Matte Black Olive Bone

SHIPS IN 3-5 DAYS

01 / 03

## Counter-balanced spout

A 12° draw angle and weighted base keep the pour true at any speed. No wobble, no over-pour — just the line you intended.

02 / 03

## Cool-touch walnut handle

Turned from American black walnut and finished by hand with food-safe oil. Stays cool through three pours, finds the grip on its own.

03 / 03

## Induction-safe base

Triple-clad 304 stainless plate works across induction, gas, and electric. Even heat in under two minutes — without a thermal coat.

THE PARTICULARS

# Built once, kept for years.

Every kettle is checked against a tolerance of  $\pm 2$  grams and a pour test, by hand, before it leaves the workshop.

A SLOW ORIGIN

# From a workshop in Portland.

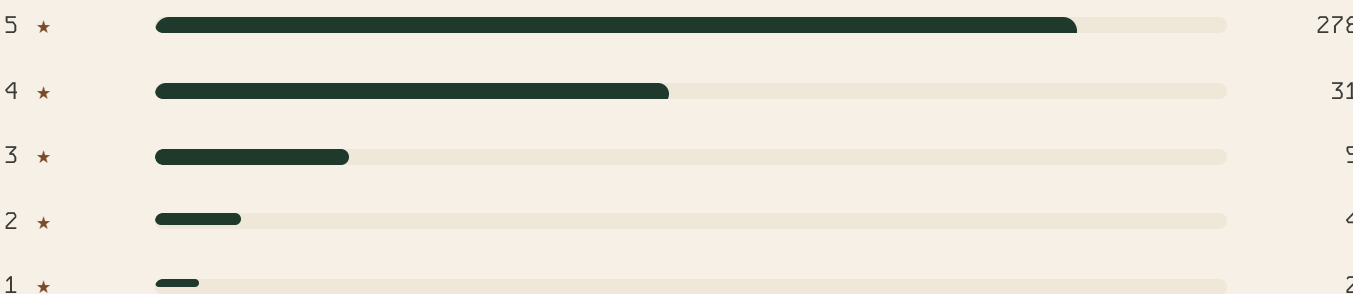

It started on a rainy Tuesday in a leaky garage off Alberta Street. Two woodworkers, one welder, and a small kiln. We wanted a kettle that respected the ritual — heavy enough to hold its line, quiet enough to start the day with. So we made one. Then we made it again, and again, until the spout poured the way we wanted it to.

Each Northwind is hand-finished and tested with water before it's boxed. We don't ship on Mondays. We oil the handles on Thursdays. There is no fourth color coming.

— Tomás & June, founders

WHAT PEOPLE SAY

★★★★★

"Heavier than I expected, in the best way. The pour is so steady it almost feels like the kettle knows what it's doing."

★★★★★

"Slow mornings, finally. I bought it for the look and stayed for how quiet the boil is — no whistle, no rattle."

QUESTIONS, ANSWERED

# Before you brew.

Is the kettle safe on induction stovetops?

Yes — the tri-clad 304 stainless base is rated for induction, gas, electric coil, and ceramic. We don't recommend open flames above the spout join.

How long does it take to boil 600 ml?

Roughly 3 minutes on induction at full power, 4 minutes on gas. The body is intentionally heavy — it holds heat past the boil for a longer, steadier pour.

Can the walnut handle go in the dishwasher?

No. Hand-wash with mild soap and a soft cloth. The wood is finished with food-safe oil; we'll re-oil it for free, by mail, for as long as you own the kettle.

Do you ship internationally?

We ship to the US, Canada, the UK, the EU, and Japan. Orders above \$80 ship free domestically; international flat-rate is calculated at checkout.

What is the lifetime craft warranty?

If anything fails because of how we made it — a weld, a handle attachment, a coat that lifts — we'll fix it or replace it. Wear from use is welcome, and we'll re-finish handles forever.

Pairs well with.
